2019 ANNUAL REPORT

“He who has health has hope; and he who has hope has everything.”

-Thomas Carlyle

COMPASSION INTEGRITY COLLABORATION

Good Health Clinic

Caring for the uninsured in our community

The Good Health Clinic exists to serve as a healthcare home for the low-income, uninsured living in the Florida Keys community.

Good Health Clinic is the collaborative entity that works with over 100 medical provider volunteers throughout South Florida. Patients receive top notch primary care within our clinic and benefit from care coordination and access to countless medically necessary services donated by our generous partners. Between our in-clinic services and the support of our Volunteer Network we are able to provide those in need with a true health care solution.

2019 Program Highlights:

- Good Health Clinic is one of 44 clinics invited to participate in the MAVEN telehealthcare program that supports patients and providers with specialist consultations and education not normally available in rural communities like ours.
- We are honored to assist Bahamian families displaced by Hurricane Dorian while they work to rebuild their homes and lives after this devastating storm. GHC provides these families care, specialist referrals, and prescription assistance.
- With our first year in Marathon under our belt we continue to operate our satellite clinic and bring access to healthcare for the underserved in our lower Keys Community. Over 100 patients have been served to date.

Leadership:
